

SUMIT GUPTA

Lucknow, India | summitgupta07@gmail.com | +91 7355708603

LinkedIn | GitHub | Portfolio

Fullstack Backend Engineer with **6+ year's of experience** designing scalable backend systems, realtime trading infrastructure, authentication architectures, and fintech platforms using Node.js ecosystem technologies. Experienced in building distributed systems using Redis, WebSockets, BullMQ, MongoDB, PostgreSQL, Docker, and Keycloak RBAC authentication systems. Strong expertise in crypto exchange integrations, secure API development, realtime communication systems, and backend system design.

SKILLS

Languages: JavaScript, TypeScript, SQL, NoSQL, HTML, CSS.

Backend: Node.js, Express.js, Fastify, Nestjs, Redis, Keycloak RBAC, Socket.io, BullMQ, Multitenent system, WebSocket, JWT

Server: Nginx, Docker, Pm2, Digital Ocean, Aws S3, Monolithic and Microservices, Laravel Forge.

Databases: SQL(MySQL,Postgres), NoSql(Mongodb),ORM's(Prisma,Mongoose,Sequelize)

Blockchain/Web3: Web3.js, Ether.js, Solidity, DEX and CEX exchange Integrations

Security: Symmetric, Asymmetric and Crypto Encryption, AES and Node RSA encryption

Frontend: HTML, Tailwind CSS, Javascript, React.js, Next.js

Tools/Platforms: Git, GitHub, Bitbucket, Cursor, Vercel, Jira, Codex, Antigravity.

Learning/Playing Around: Kubernetes, Terraform, AWS, Azure.

CERTIFICATIONS

Certificate: Oracle Cloud Infrastructure Certified AI Foundations Associate — October 2025

WORK EXPERIENCE

Backend Developer

ITH Technologies

March 2024 – Present

Kanpur, India

- Architected the **PREX** authentication and authorization infrastructure with multilevel token distribution workflow.
- Designed and implemented **Keycloak RBAC-based** authentication and protected API systems for CRM TDMM client management platform.
- Developed scalable backend APIs for **Freemium Client** onboarding, self-registration, and token management dashboards.
- Boosted the **Client** engagement, engineered realtime backend workflows for token launch and client engagement systems across centralized and decentralized exchanges.
- Built **TeaPro** multitenant task assignment and ticket management infrastructure with rollback-safe transaction handling.
- Implemented MongoDB replica session-based rollback mechanisms for failure-safe task operations in **TeaPro**.
- Developed token reward and point distribution systems for **BrainAlive** application using scalable backend architecture.

Backend Developer

July 2023 – Jan 2024

Coding Web Tech

Lucknow, India

- Developed secure JWT authentication and authorization APIs for **BigBank** crypto trading exchange.
- Integrated external trading exchanges including **CoinDCX** and **Wazirx** for crypto buy, sell, and wallet operations.
- Implemented realtime P2P trading communication systems using **Socket.io**.
- Integrated TradingView charts for live cryptocurrency market visualization.

Backend Developer

July 2021 – June 2023

Future Finance Exchange

Lucknow, India

- Built scalable authentication and authorization systems for **Tradekia** and **FUFI Edge** trading platforms.
- Developed multilevel token distribution architecture supporting hierarchical referral tree systems upto level five.
- Integrated **TradingView** realtime chart systems and cryptocurrency market updates.
- Implemented **Zendesk** customer support integrations and realtime chat systems.
- Engineered P2P trading communication infrastructure using **Socket.io**.

Open-Source, GitHub

Dec 2019 – 2021

- Developed RESTful backend APIs using Node.js, Express.js, and MongoDB for open-source applications.

PROJECTS

PREX — Backend Engineer

- **Tech used:-** Nestjs, fastify, nodejs, bullmq, redis, postgres, jwt.
- Designed complete authentication, authorization, and multilevel token distribution backend architecture.

CRM TDMM — Backend Engineer

- **Tech used:-** Expressjs, nodejs, keycloak rbac, redis, mongodb, jwt, websocket, docker.
- Implemented Keycloak RBAC authentication and protected API infrastructure for centralized client management systems.
- Created the **Freemium Client** dashboard related system for the self register signup and client tokens dashboard related backend apis.
- Client Engagment and easy of managing client on the single portal boosted the workflow for client onboarding and client tokens management .

TDMM CEX, DEX and TradeMachine

Tech used:- Expressjs, nodejs, redis, mongodb, jwt, websocket.

- Integrated Binance, CoinDCX, and Bybit exchange APIs into unified realtime trading infrastructure using Redis and WebSockets.
- Integrated and synchronised all exchanges response to single response for the tdmm portal .

- Managed the buy and sell orders via redis and websocket for the realtime order update and price movement.

BrainAlive

Tech used:- Expressjs, nodejs, mongodb, jwt, websocket.

- Developed reward and point distribution backend systems with complex token logic and scalable APIs.

Tea Pro

Tech used:- Expressjs, nodejs, redis, mongodb, jwt.

- It's a multi-tenant application where I built rollback-safe multitenant task management systems using MongoDB session transactions.
- Developed a feature milestone task management for projects and users for better delivery of the projects.

Bigbank Exchange

Tech used:- Expressjs, nodejs, mongodb, jwt, websocket.

- Created the backend for the **BigBank** Crypto Currency Trading Exchange and Integrated with the Frontend.
- Integration of other Trading Exchanges like **CoinDCX**, **Wazirx** etc for crypto buy, sell and holding in wallet.
- P2P trading with Chat support system using **Socket.io**, **TradingView Chart** integration for charts.

Tradekia Exchange

Tech used:- Expressjs, nodejs, redis, mongodb, jwt, websocket.

- Developed secure JWT authentication and authorization APIs for **Tradekia** crypto trading exchange.
- Implemented the multi level token distribution platform for the **tradekia** upto six level ancestor and children via tree in tradkia exchange.
- Integration of **TradingView** Chart for the **cryptocoin** charts and token updates.
- Integration of **Zendesk** customer care support.
- P2P trading with Chat support system using **Socket.io**.

FUFI Edge

Tech used:- Expressjs, nodejs, mongodb, jwt.

- Developed secure JWT authentication and authorization APIs for **FUFI Edge** application.
- Implemented the Airdrop apis for the FuFi Token. Connecting Web2 to Web3.

EDUCATION

Bachelor of Technology in Electrical Engineering, AKTU University, Greater Noida - 2019 - First Grade(75)

Jawahar Navodaya Vidyalaya, Intermediate High School, CBSE board, Jaunpur Uttar Pradesh – 2006-2014 – Intermediate First Grade(82) and High School 9.4 CGPA
